TEACHER PLUS

Growing as a teacher *Effective strategies*

Professional growth is important in any profession. As a teacher how are you growing?

A Toolkit for teachers

This Teacher Plus e-book brings its readers a parcel of ideas that they can dip into when they are running low on ideas and inspiration.

Ideas for primary school *The complete set*

If you are a primary school teacher and are looking for ideas to teach with different materials, or are exploring ways to develop a scientific mind in your little students, or want to turn their math phobia into mathmania, or help them express themselves best then look no further than this new **ebook** from **Teacher Plus**.

Ideas for primary school: The complete set features four of our best selling ebooks.

- ☞ **Tips and suggestions for teachers**
- ☞ **Language lessons**
- ☞ **The art of teaching social studies and science**
- ☞ **Maths made easy**

Ideas for primary school *Tips and suggestions for teachers*

Find out how to use clay, paper, dice, etc., to build basic thinking and coordination skills. Also find projects to help children see the interconnections between all areas of learning.

Ideas for primary school *The art of teaching social studies and science*

Develop a scientific curiosity and interest in young minds and help them explore ways to look at the social world through articles from this ebook.

Ideas for primary school *Maths made easy*

Keen on helping your students turn their mathphobia into mathmania? This compact set of articles, the fourth in our series, "Ideas for Primary School" offers ways of doing just this.

Ideas for primary school *Language Lessons*

This ebook takes the reader through a rich tapestry of ideas that can be applied across languages. Some articles address basic structural issues in language while others focus on the relational and expressive aspects.

Can also be brought individually
